
Data Contract for Satisfaction Prediction Data Product

This data contract outlines the components and details of a data product designed for satisfaction prediction use case. The product includes training and test datasets, Jupyter notebooks, predictive models, and an R Shiny dashboard, all hosted on IBM Cloud.

Data Identification

- Dataset Domain: <customer domain>
- Data Product Name: <name>
- User Consumption Mode: <example: ML training data>
- Version: 1.1.0
- Status: <example: initial draft>
- UUID: 53581432-6c55-4ba2-a65f-72344a91553a

Detailed Information

- Description:
 - Purpose: <description>
 - Limitations: [To be specified based on data sensitivity, privacy concerns, etc.]
 - Usage: <describe typical sample use case>
- Tenant: [Your Organization Name]

Support and Feedback

- Product Email: <email>
- Product Slack Channel: '<channel name>'
- Product Feedback URL: <URL link>

Technical Specifications

- Source Platform: <example: IBM Cloud>
- Source System: <example: Db2ACH>
- Dataset Project: <example: Customer_Analytics>
- Dataset Name: <name>
- Kind: <example: relational data>
- Type: <example: tables>

Data Quality and Governance

- Quality Measures: <Details about data accuracy, completeness, etc.>
